

Field Success Story: Keen Green Products, LLC.

Certified Distributor of New Age Blast Media®

"New Age Blast Media® is not only fast, but it leaves an ideal surface for primer and paint. You can even go over the stainless rammer without damage, like I did on my back hoe!"

New Age Blast Media® has now been certified for use by:

Superior Soda Blasting Ft. Wayne, IN.

Superior Soda Blasting needed to find a blasting media that could provide enhanced performance vs. soda on surfaces like delicate car parts, but that was tough enough to remove light rust off his old rusted equipment. Their recent work for customers have validated that **New Age Blast Media®**'s field performance can:

- ** Remove **RUST** on the metal unlike lighter media such as soda.
- ** Provide for fine profile which negates the need for sanding. Major savings on part preparation on time and materials vs. the use of non profiling agents like soda.
- ** Prevent the need to wash the surface with vinegar solutions after blasting to prep surface for coating. Glass is non toxic and inert with stable **ph** levels.
- ** Ask about our **Fine (70-100mesh)** and **Medium (4070)** as a cost effective way to blasting on fine or delicate substrates.
