

# Wicked Powder Coating

Sewell, New Jersey

Mike Brattelli, owner of **Wicked Powder Coating**, is currently using **New Age Blast Media®** products at his custom powder coating and sandblast shop located in Sewell, NJ. Blast cleaning metal parts is a key step in powder coating to create a clean, contaminant-free surface to ensure a high quality, long-lasting finished product for his customers.

Mike, the owner of **Wicked Powder Coatings**, blasted a motorcycle using **New Age Blast Media®** medium grit at a range of 80psi on the tougher parts and the **New Age Blast Media®** fine grit on the lighter parts. This achieved the clean, almost white finish that was needed before applying a coating.

*“Thank you guys so much for being so knowledgeable and helpful. Your product works amazing for my powder coating and sandblasting business. I do mostly custom cars and motorcycles and your product works perfect for my applications and the price is unbeatable. Thank you again for your great service, convenience, and knowledge.”*
